London, Sept. 6.-A Paris dispatch says that a bold atempt was made yesterday to explode a bomb in Rothschild's bank in the Rue Lafitte. While the business of the day was at its height a man walked into the bank carrying under his arm a bomb to which was attached a lighted fuse. One of the detectives who is employed in the bank was standing near and sprang upon the man, seized the bomb and extinguished the fuse in time to prevent an explosion. The would-be bomb thrower was arrested and taken

to the police station. This attempt to blow up the Rothschild banking establishment, taken in connection with the recent sending of an infernal machine through the mails to the office of Baron Aphonse Rothschild, signifies a persistent purpose on the part of the Anarchists to inflict injury upon the heads of the Rothschild house and the employes. It will be remembered that Baron Rothschild's secretary, M. Jacobowsky, was terribly injured by the explosion of the infernal machine sent to his employer's office, while attempting to open the parcel in

posed that the prisoner is a barber, a razor, brush and soap box having been found in his pockets. Immediately after the detective seized him he drew the razor and attempted to kill himself by cutting his throat. During his examination at the police station he defended his Anarchist opinions in well chosen language. He said the bomb contained fifteen grammes of chlorate of potash and twenty-five grammes of blasting powder. It contained no projectile. He intended to use it as a protest against the proceedings of the bankers. He professed profound contempt for work.

The Big Battle-Ship Indiana Cannot be Accommodated in This Country. Washington, Sept. 6. Owing to misnanagement and political dickering on the part of the present Secretary and Assistant Secretary of the Navy, the ountry is forced to the humiliation of having its first big battle-ship docked in foreign country. "The situation is listressing to all who are interested in the building up of the navy, and the fact should be known that Mr. Herbert and Mr. McAdoo are to blame for the conditions." Thus spoke a naval officer of high rank, who manifested a disposition to say more, but checked him-

Mr. Cramp, builder of the Indiana, announced that, there being no government or private dock in this country which will accommodate the ship, she will be taken to Halifax in order that her bottom may be scraped and painted for her coming trial in October to determine whether she comes up to con-tract requirements. It had been hoped that the Port Royal dook would be found sultable for the big vessel, but as recent developments have shown that that dock is defective, there is nothing to do but to send the Indiana to an English port. Halifax is the nearest place where there is a suffici-ently large dock to take a battle-ship.

One of class owns a handsome residence and even the thought of an agent provokes his ire. One evening recent ly he was enjoying his otium cum dig when a man walked in on him very inceremoniously. The visitor was otal stranger to him, and before h had time to throw an inkstand at him to ask him to sit down he began and in a most business-like one to talk.

That's what the visitor said, but fr. Otium-cum-dig. didn't hear it all; had gone to the fire, and the visitor niled and followed him.

Hibernation of Snails.

It is believed that all shell-bearing and mollusks either hibernate of testivate according to conditions of limate. Most of the snails close the perture with a membranous or cor ceous covering, consisting of lime and mucus, which is called an epi-phragm. W. G. Binney has thus des-ribed the operation: "The animal eing withdrawn into the shell, the collar is brought to a level with the sperture and a quantity of mucus is ured out and covers it. uantity of air is then emitted from e respiratory foramen, which de aches the mucus from the surface of he collar and projects it in a convex orm like a bubble. At the same mo nent the animal retreats farther into shell, leaving a vacuum between tself and the membrane, which is consequently pressed back by the exernal air to a level with the aperure or even farther, so as to form concave surface, where, after be-oming desiccated and hard, it renains fixed. These operations nearly simultaneous, and occupy but in instant." As the winter advances he snail withdraws deeper and deep er, shutting itself out by other epi retreats, until sometimes it has made no less than half a dozen, one within the other. Interchangeable Heels.

An English firm have recently been granted letters patent for an invention whereby the heels of boots and shoes can be easily detached or reversed. The invention consists of steel, or any similar material, shaped as a lift, with flange and groove, by the first of which it is fixed in any part of the height of the heel at the option of the maker, while the upper portion of the heel is so constructed as to slide into position so that it is indistinguishable from an ordinary heel; but to insure absolute security a fine screw is in-serted from the inside. The advantages claimed for it are that when the top piece becomes slightly worn down the wearer can reverse it to the other boot, and after these have been well worn they can be replaced by a new very small cost.-Shoe and Leather Facts.

California Misfits.

There is at least one level-headed farmer in San Joaquin County. There is more point in the following few lines than can be found in an average speech occupying as many columns. He says: "We let our timber rot and buy fenc-

We catch five-cent fish with a four-dollar rod. We build school-houses and send our children off to be educated. And, lastly, we send our boys out with a forty-dollar gun and a tendollar dog to hunt for ten-cent birds.' That is precisely what is being done all over the State.—San Francisco Call.

CHINESE SMUGGLERS.

The Trouble they give Uncle Sam's Reve The customs officers of San Francisco have to deal with some of the most artful smugglers in the world. The Chinese are a race of smugglers, and there is not a people on earth more fertile in expedients to evade the revenue laws. Their stolid, impressive demeanor serves them admirably in their contraband operations, for their actions seldom afford, as is the case fre quently with white people, any ground to suspect they are trying to practice a fraud. They have taught the sailor

trick practiced on Uncle Sam's tax gatherers and are never caught in one device without being ready with another one equally as hard to detect. Before the influx of Chinese laborer was stopped, a Mongol, looking as if all his years were acquainted with only poverty and toil, would sometimes try to sneak ashore with a dirty old blouse stuffed full of fine silk handkerchiefs and scarfs and Indian neck shawls The Chinese garment for cold weather

men of the white race the shrewdes

is a quilted blouse or tunic, with a filling of cotton. Silk handker chiefs being light and fine, a single blouse would sometimes contain a valuable invoice.

Sometimes a demure Chinese maider would step ashore with the thick soles of her shoes stuffed with silk. A whole covey arrived some years ago with their shoes stuffed in this fashion. An inquisitive inspector had his attention attracted to the extraordinary thickness of the soles and made an investi gation, which resulted in a valuable

seizure. To a man the Chinese crews on the steamers plying between San Fran-cisco and Mexico, South America and the Orient are smugglers. They hide their contraband goods in the oddest places imaginable and get them ashore past the eyes of the customs officers in ways that almost baffle detection.

They have brought opium skilfully stuffed in bananas still hanging to the stalk and in oranges. One day about six years ago a Chinese dressed as a cook walked leisurely down the gangplank of a Pacific Mail steamer with basket on his arm containing several oaves of bread. He shuffled right by a customs house officer and would have got away all right, but on the wharf ame into collision with a drunken sailor. The sailor, who was to blame gave the Chinese a violent shove, send ng him sprawling and scattering his bread loaves. A policeman interfered and noticed that one of the loaves had broken open. He started to examine and the Chinese started to run. Every

loaf was filled with opium. Chinese have been detected with boxes of the drug deftly bound up in their queues or tied under their arms. Every bit of baggage and every article they take ashore is a hiding place. Beams on ship and table legs have been hollowed out as receptacles for contraband opium. False bottoms are put in cubby holes and pantry draw ers. Hiding places are sought in coal bunkers and under the engines and The methods of secretion are boilers. so varied and ingenious that frequent ly the officers are unable to find smug hite cloth, trimmed with chenille fills, high belt, blouse corsage, with gled opium, even after they have def nite information that it is aboard a vessel. Southern Railroad Building: The financial depression has not had a very decided effect on railroad construction in the South. The total number of miles of railway built in this ection since January 1 of last year is only fifty-seven miles less than was built during all of the year before. The total new mileage in the South for last year, up to December 1, was 1,112 miles. Texas leads with 216 miles, Florida comes a close second with 208 miles, and Georgia is third with 171 miles.—Atlanta Journal.

Lady and Woman.

It has been decided by an English court that it is not libellous to call a lady a woman. This recalls the fact that in a Western town, a couple of years ago, a young woman who work d as a clerk in a dry-goods store threatened to sue a newspaper for libel because it referred to her as a sales-woman and not as a saleslady. She did not carry out her intention, however, as she was advised that she had no case.

PLATT SNOWED UNDER IN ERIE.

the State Convention Buffalo, Sept. 10 .- The result of last night's caucuses in Erie county will be a solid anti-Platt delegation to the State Convention. The organization which is opposed to Platt won easily in the eight Assembly Districts, and not a Platt man will be elected as a delegate

to the convention to-day.

Congressman Rowland B. Mahany, the leader of the Platt forces, falled by sixty votes to carry his own ward. The only ward which went for Platt was the thirteenth, where John Kraft, Deputy Superintendent of Canals, was elected without opposition, as the organization was confident of carrying the Assembly district.

1,000 Turkish Soldiers Sald to Have Rendered 5,000 People Homeless. London, Sept. 10 .- The Daily News publishes a dispatch from Kars saving that fresh outrages have been perpetrated in the Erzinziian district. A band of brigands attacked, on August twelfth, a company of Turkish gendarmes, killing a sergeant. Therefore, the Turkish authorities, without making any inquiry, decided that the assailants were Armenian revolutionists from Kemakh, who intended to release exalted Armenians who are still in prison

at Kars.

A force of 1,000 Turkish troops was sent to Komakh, and five villages were pillaged. Five thousand persons were rendered homeless. Men were tortured and women assaulte 1. Four monasteres were sacked. It is reported that the Turkish minor officials have formed an anti-Christian society to slaughter Christians if the P rte accepts the scheme of reforms the powers insist upon.

NAVAL VETERANS PARADE. Nearly 200,000 Strangers in Louisville for

the G. A. R. Encampment. Louisville, Ky., Sept. 10 .- It is doubtful if this city ever before entertained as many guests as are here to-day. Certain it is that the town never before had within its limits so many battlescarred soldiers. It is conservatively estimated that nearly 200,000 strangers

are here, and the majority of them 30 years ago bore arms either for the Blue or the Grey. Blue or the Grey.

But the blue and gray are one to-day, and men who were then at war, walk arm in arm as brothers.

The event of to-day was the grand parade of the Naval Veterans' Association. All Louisville turned out to see its old citizens. The Naval Veterans' parade started after 19.30, the hope fixed, with fully 10,000 men in line. Of course, they were not all veterans, and of Uncle Sam's war navy. But the ungerans of the navy were the center of attraction.

Coperatown, Sept. 10.—Theresa Maschke, the 12-year-old daughter of Moses Maschke, a clothier, died last night from infuries received yeaterday afternoon by coming into collision with a team of house while riding a bloycle around a corner. The file was frightfully out about the head and face. 35 MINERS MAY BE LOST.

A Solid Anti-Machine Delegation will go to They Did Not Heed the Warning of Danger at Houghton, Mich.

Houghton, Mich., Sept. 9 .- It is posttively known that thirty-five doomed men are entombed in the Osceola mine with no possibility of the recovery of their bodies until the fire is extinguished, which may not be for months. It is the opinion of some of the oldest officials of the mine that the fire was the work of

an incendiary.

All of the doomed miners might have escaped had the heeded warnings, as Captain Edwards, who was the first to detect the existence of fire, dispatched messengers to every slope where miners were known to be working. As the mine is not heavily timbered except in the shafts, the idea of serious danger was scouted. By going a roundabout way all the men who were in the lower level of No. 4 shaft might have escaped, but they preferred the shorter route of ascent by that shaft, and when they got up to the eighteenth level they found themselves out off. Some passed into lateral shafts, expecting to reach other shafts. Twenty of the thirty-five are married men and most of them have large fam

Twenty Thousand Persons Heard Him is Chemung County (N. Y.) Fair Grounds. Elmira, Sept. 6 .- United States Senator David B. Hill spoke to 20,000 persons at the Chemung county fair yesterday afternoon. He refrained from discussing politics further than to refer briefly to the last Legislature in this State. Speaking of it, he said, among other things:

"I may be pardoned for suggesting that in the matter of law-making it outdid any of its predecessors since the or-ganization of the State government. It actually passed 1,045 separate and dis-tinct bills, which became laws. It is not possible that all of these laws were actually necessary. On the contrary, there were hundreds that were unnecessary, special in their character, mischievous their tendencies, unwise or uncalled

"In the multiplicity of laws there is no safety; there is confusion, a tendency to corruption, a waste of valuable time, un-likelihood of their enforcement, and general demoralization.

the Commoners. Cardiff, Sept. 5 .- At the session of the Trades Union Congress to-day the Par-Hamentary committee was instructed to urge upon Parliament the passage of a bill declaring for the principal of payment of salaries to members of the House of Comons.

Mr. Sexton, a delegate from Liverpool, in seconding a motion for the adoption of a resolution in favor of the prohibition of the landing of pauper aliens, said he wished to include within the scope of the resolution royal paupers who arrive without visible paupers who arrive without visible means of subsistence, but who soon

Archbishop of Canterbury Protests Agains Reunion With the Catholic Church. London, Sept. 6.-The Archbishop of Canterbury has issued a long pastoral letter dealing with the Pope's recent letter to the English people and the appearance in the Church of England lately of certain foreign usages and forms of devotion.

He recognizes the desire for reunion as haracteristic of our times, and admits characteristic of our times, and admits that divisions among Christians are the chief obstacles to the progress of the Gospel. He accepts the many expressions of anxiety for delivery from these divisions as a sign of God's purpose, but protests "against the introduction of modern Roman innovations in the ritual and docinnovations in the ritual and do

The Antis Elect 70 of the 99 Delegates to the County Convention.

Lockport, Sept. 5.-The political fight between the Platt and anti-Platt factions of the Republican party in Niagara county has resulted in a complete victory for the latter.

The anti-Platt forces, led by Richard Crowley and Assemblyman Clark, have elected about seventy of the ninety-nine delegates to the county convention, indicating the nomination of an entire anti-Platt ticket in this county and John H. Clark for Senator. The fight has been a very hot one throughout, and the feeling is very bitter between the Republican factions.

ATTEMPT TO BLOW UP A CHURCH.

Michigan Vandals Use Dynamite to Get

Money From a Corner Stone. Greenville, Mich., Sept. 9 .- An attempt was made yesterday to bow up the First Congregational Church of this city with dynamite. The charge was placed under the corner stone, but not being put under far enough, little damage was done. The supposition is that the attempt was made for the purpose of obtaining a large sum of money that is reported to have been deposited in the corner stone when the church was built.

Experience of a Lecturer with the Hair The wild ungovernable passion a barber has for trimming your hair On the 4th of December I was in Bos ton, thinking about a lecture I was expected to deliver in the evening, and so badly scared that I couldn't re member the subject nor what it was about. I went into a Tremont street "Institute of Facial Manipulation and Tonsorial Decoration," and inquired for the professor who occupied the chair of Mediaeval Shaving and Nine teenth Century Shampoo. One of the junior members of the faculty, who was brushing an undergraduate's coat pointed me to a chair, and I climbe n. When the performance was about concluded, the barber said to me:

"Have your hair trimmed, sir?" I believe not. "Needs it very badly, sir," he said; 'looks very ragged." I never argue with a barber. I said: All right, trim it a little, but don't

make it any shorter." Immediately he trimmed all the curl out of it, and my hair naturally, you know, has a very graceful curl to it never discovered this myself until a few months ago, and then I was very much surprised. I discovered it by looking at my lithograph.

Well, anyhow, he trimmed it. On the 6th of December I was a Bath, Maine. Again I was shaved, and again the barber implored me to let him trim my hair. When I an-wered him that it had been trimmed only two days before, he spitefully asked where it was done. I told him and he gave expression to a burst of

sarcastic laughter. "Well, well, well," he said at last, 'so you let them trim your hair in Boston. Well, well. Now you look ike a man who has been around the world enough to know better than that."

Then he affected to examine a lock or two very particularly, and sighed heavily.

"Dear, dear," he said, "I don't know really, as I could do anything with that hair or not; it's too bad." Well his manner frightened me, and told him to go ahead and trim it, out please not to make it any shorter he said, "oh, no, it wasn't necessary to cut it any shorter; it was really too short now, but it did need

trimming. So he "trimmed" it, and when I faced the Rockland audience that night, I looked like a prize fighter. In four days from that time I was sitting in the chair of a barber down in New York State. He shaved me n grateful silence, and then thought fully run his fingers over my lonely hair.

"Trim this hair a little, sir?" he said 'straighten it up about the edges?"
I meekly told him I had it trimmed wice during the preceding week, and was afraid it was getting too short

for winter wear.
"Yes," he said, "he didn't know but what it was pretty short, but you didn't need to cut it any shorter to trim it. It was in very bad, ragged shape at the ends."

I remained silent and obstinate, and he asked me where I had it trimmed last. I told him and he burst into a shout of laughter that made the windows rattle.

"What's the matter, Jim?" inquired an assistant partner down the room. holding his patient in the chair by the

Jim stifled his laughter and replied: "This gentleman had his hair trimned down in Maine." There was a general burst of merriment all over the shop, and the aprentice laid down the brush he was with Lincoln. "Did he give you his washing and came over to look at the mpression of Lincoln when he return-Maine cut, that he might never forget it. I surrendered, "Trim it a little, then," I groaned, "but, in the name of humanity don't cut it any

"No," the barber said, "he wouldn't make it a hair's breadth shorter."

When I left that shop, if it hadn' been for my ears, my hat would have fallen down clear on my shoulders. When I reached the hotel, everybody started, and a couple of men got up and read a handbill on the wall, descriptive of a convict who had recenty escaped from Sing Sing, and looked from the bill to myself very intently. That night several of the audience

The barber of that sleepy village, who, in the interval of his other duties acts as mayor of the town, and edits the local papers, undertook to shave me with a piece of hoop iron he pulled out of his boot leg. When I resisted he went out into the kitchen and came back with a kitchen knife and a can-opener, and offered me my choice. I selected the can opener, and he began the massacre, remarking in-cidentally that he used to keep a good sharp spoke shave for his particular customers, but he lost it. Then he said my hair needed trimming, very badly. I protested that it was impossible, it had been timmed three times within ten days, and was as short now as a business man on the

1st of January.
"Oh," he said, "it wasn't too short. and beside there wasn't no style about it at all." He could give it some shape, however, he said, without mak ing it any shorter. So I surrendered and told him to

shape it up. And if that foredoomed, abandoned, Amsterdam son of an oakum picker didn't go out into the woodshed and come back with a rusty old horse rasp and began to file away what little hair I had left. He allowed a few shreds and patches to re main, however, clinging here and there to my scalp in ghostly lonellness. I rather feared that my appearance that evening would create a panic, but it did not. I observed that the majority of the audience had the heads "shaped up" after the same manner, and were rather pleased with my conformity to the local custom and

Well, I got along to Corry, Pa., and rushed in for a shave and got it in no time and two motions. "Hair trimmed, sir?"

I supposed he was speaking sarcas tically, and so I laughed, but very feebly, for I was getting to be a little sensitive on the subject of my hair or rather my late hair. But he re or rather my late hair. peated his question, and said that needed trimming very badly. I tole him that was what alled it, it has been trimmed to death; why, I said my hair has been trimmed five time during the last thirteen days, and was afraid it wouldn't last much

"Well," he said, "It was hardly the thing for a man of my impressive appearance, who would naturally attract attention the moment I entered a room (I had to stand on tiptoe and hold on with both hands to look over the back of a car seat) to go around with such a head of hair, could straighten it out for me in a

I was a little dismayed at first when looked at my glistening poll, but after all it was a relief to know that the end was reached, and nobody could torment me again to have my hair trimmed for several weeks. But when I got shaved at Ashtabula, the barber insisted on puttying up the holes and giving my head a coat of shellac. I yielded, and my head looked like a varnished globe with the maps left off. Two days after, I sat in a barber's chair at Mansfield. The barber shaved me silently. Then paused, with a bottle poised in his

The negro race in this country is rising rapidly. With but thirty years of opportunity, the negro in education is nearly the equal of the white man, a fact forcibly demonstrated by the hostility of the Tillman gangs to the "Mississippi plan," on the ground that with only an educational qualification for suffrage the negroes will dominate the State in five years. Spite of slander and villification of pres and platform, the American people are beginning to feel the rise of the darker race in intelligence, social elevation, and business enterprises. The young negroes of this generation constitute an abler and more progressive people than the slaves, and in spots they are exciting jealousy and apprehension.

No one can doubt for an instant or fail to see that the success of this movement will result in persecutions of wealthy and intelligent negroes, and property-owning negroes especially. The theory that factional appeals for and buying of the negro vote will protect the negro even better than he is now protected, is an absurdity that needs no comment other than silent contempt. The negro will not leave South Carolina, for he knows a good thing, and besides there is nowhere for him to go were he willing to depart. He is going to stay in South Carolina, and then get education, accumulate property, and multiply. In view of this fact, the present issue in South Carolina is, in our judgment, of momentous importance to every well-to-do and enterprising negro in the United States. It is not much his tariff views as it is his strong mind and being party man.

He would make a liberal President and one that would certainly protect our American industries, and human liberty. The great question of to-day is, what is to become of the rights and liberties of that class of people who have been disfranchised, a prejudice sentiment that has been dangerous to the prosperity of the country hat pre-

What is then mostly needed? It is the election of a President who has backbone enough to enforce the laws that govern this country. It is said that the constitution and laws of the United States are inadequate. It is not so. There are sufficient laws on the statue books to protect all claims of citizens against unjust discrimination Mc-Kinley is that man; he is the man to see all laws are enforced and the country would be safe in electing him the President of the United

The latest report from Silcott Springs is, that a colored man by the name of Allen was seized by a crowd of ruffians; a rope tied around his waist and carried to a magistrate to be identified as the man who committed an assault on a white woman. There was a reward of \$250 offered for the capture of the man, hence it was important for these white renegades to capture some one. Fortunately Allen was not the man and he was released. Allen was a friend of Mr. and Mrs. Webb, the owners of Webb's cot-

The boarders who were eating dinner at the time lost their appetites when the news was brought to them about poor Allen's arrest and the charge against him.

The democratic negroes of Pennsylvania are denouncing the white democrats of South Carolina be cause they intend to disfranchise the negroes of that State. If those Pennsylvanians, as well as other negroes who support the democratic party, will learn some sense they would not have any cause to complain. All the asses will not be dead until the democratic negroes are laid six feet under ground.

It is rumored that the school board will recede from its position when it dropped certain school teachers. If the teachers are to be reinstated they should not have been removed.

Well, the politicians are anxious to know who will put up the boodle to go to the next convention. That seems to worry them more than the candidates for delegates.

The politicians say that the next fight will be one of money. The BEE is of the opinion that it should be one of human rights.

There is not a negro judge any where in the United States, and yet it is said there is no prejudice in America.

A LIBERAL ORGAN OFFER.

That there has been a revolution to the manufacture of Organs and Pianos is evinced by the current offer of Cornish & Co., the well known manufacturers of Washington, N. J. For the next 60 days they offer to self an organ or \$42.50, which a short time ago would have been considered a desirable bargain at \$75.00. With this they offer terms of credit that are sure to meet with the approval of every fair-minded person. Cornish & Co. are the largest makers of Pianos and Organs in the world selling direct from the factory to the home. Since the conception of this great business, nearly thirty years ago, they have been fighting the method of selling instruments through agents and dealers, heir plan being to give the enormous profits usually retained by the tradesman to the buyer. Their efforts to place first class instruments within the reach of all, at manufacturally profits and the place red by the state of the s er's prices and the most liberal terms, deserves the highest commendation. Every one who is contemplating the purchase of an Organ or Piano, should get the cotalogue issued by this firm. TUG OF WAR AT AMSTERDAM

TWENTY-SEVENTH DISTRICT RE-PUBLICANS HOLD A CONVENTION.

Hobart Krum, of Schoharie County, Philip Keck, of Fulton and Stafford Moshier, of Canajoharie, the Leading Candidates for the Senatorial Nomination Mr. Krum Expects to be Benefitted by the Factional Fight Among the Other Delegates - The Convention Meets at Noon To-Day.

Amsterdam, Sept. 10.-It is believed here that the convention which assembled at 1 p. m. to-day to nominate a Republican candidate for Senator from the Twenty-seventh district will engage in a tedious tug of war. As has been previously stated, Montgomery and Schoharle counties are each represented by seven delegates, with Fulton and Hamfilton together having the same representation. Schoharie comes instructed to stand by Hobart Krum to the very last, and the situation in the Fulton-Hamilton delegation, who are for Assemblyman Philip Keck, is the same. The Montgomery delegates, after a fight in the county convention, in which Assemblyman Gardiner was defeated, are supposed to represent Stafford Moshier.

There is a bitter rivalry of long standing between the Montgomery and the Fulton county organization, dating back to the time that Harlan P. Kline, who was nominated for State Senator after a bitter fight in the convention, was defeated at the polls. It was charged at that time that the Fulton county Republicans organized a revolt nd openly peddled the Foley tick folded up in the otherwise straight Republican ballot. Kline was very popuar in this county, and his defeat ran-

kied the local Republican leaders. Krum's friends expect to be benefited by just this feeling, and are looking for a final break of the Montgomery delegation. On the other hand, Keck's supporters are declaring that after a reasonable amount of balloting they will carry with them four of the seven Montgomery delegates. They are not giving out their names, it is true, but the politics that dominated the late convention of this county is supposed to be so well known that some of the Amsterdam people are naming F. B. Englehardt, of St. Johnsville; George L. Davis, of Fonda, and Willis Wendell and Cornelius Van Buren, of this city, as the men who will at last decide the nomination of Keek.

The other three delegates from this county, Joseph Moore and Keller Edwards, of Fort Plain, and Willis Bullock, of Cana-joharts, are expected to remain firm for Moshier. Some of the delegation, in the interest of harmony, are talking about a dark horse, but neither the Keek or the Krum men will be first to accept such a compromise. In other words, if there is to be any arrangement of that sort it will follow only after outside influence from influential quarters have been enlisted. Hobart Krum was first in the field, his representative, Chairman of the Socharle County Committee Tennish, arriving last evening. The delegation remained in Al-Some of the delegation, in the evening. The delegation remained in Al-bany last night and reached here at 8:48 a. m. The Fulton-Hamilton delegates ara. m. The Fulton-Hamilton delegates ar-rived at \$:14 this morning. They all made the Hotel Warner their headquarters. It is in the parlors of that hotel where the convention is being held.

The Senatorial Committee met prior to

Promptly at 1 o'clock the convention was called to order by H. G. Dewey, of Fulton county, the chairman of the Senatorial Committee. At the roll-call every delegate named in the respective every delegate named in the respective county conventions responded. The delegates are as follows: Schoharie, W. E. Bassler, A. L. Haines, L. W. Baxter, Addison Hagadorn, O. F. Plank, C. E. Nichols, James Van Vechten; Fulton-Hamilton, A. J. Nellis, J. P. Argersinger, G. P. Fenton, W. B. Colins, D. S. Decker, H. R. Wheeler, B. The baftery was on its way to Phenis Hill for the purpose of firing a salute of forty-four guns. There were sixty-six pounds of powder in the calsaon.

After all the demonstrations of the week, the parade to-day was the event of the twenty-ninth National Encampment of the Grand Army of the Republic, as it had been of all former encampments. Along miles of bunting and amid hundreds of thousands of cheering citizens the comrades once more marched on Southern soil. No contrast could be greater than that of the reception of the gateway of the South to-day to the opposition at its portals.

Only one thing could have added to the impressive grandeur of the demonstration. The picturesque display of red, white and blue electric lights across all prominent streets and on many buildings that had been admired so much by the visitors could not contribute to the glory of the day.

At 9.30 a second salute was fired for the first grand division to form. At 10 a. m. the guns indicated that the escort was moving to the head of the column, and at 10.30 the salute signalled all of the ten grand divisions to move. Under a proclamation from the Mayor the streets where the divisions formed and the entire line of march were cleared of everything, while the Louisville Legion, the Cadets and Kentucky National Guard patrolled the streets, and there was no delay. Mounted police first cleared the way, followed by a large detatchment. Chairman Harrison carried a very large white banner of peace mounted on a staff like the stars and stripes carried by his Confederate comrade. The two flags were alike in every respect except in the colors, one being all pure white.

Among the features of the parade was old Ned, the war horse, o er forty years old, that has heretofore tramped with the boys along the line of march. Old Ned is now so feeble that he to-day rode on a float. The New Hampshire department carried a large eagle. I WOMEN CRIMINALS.

The Record They Have Made as Murder

Continuing his discussion of the increase in the number of female criminals in Europe and America, Dr. Hugo Muench, the eminent Berlin sociologist, said to a St. Louis reporter: "The woman who captivated more men in a given time and spent more money in better style than any other in Paris was Miss Sutherland, a New York girl. Josie Mansfield was almost as notorious in the French was almost as notorious in the French capital as in the American metropolis. It was an American beauty, Miss Blackford, who captivated the Russian Grand Duke and held him in abject slavery for many months. And, go where you will throughout Europe, you will find the greatest swath in the way of high class crime is being cut by American women. Investigation has shown me that the number of advanturesses in New York is constituted. adventuresses in New York is some-thing startling-most of them made The accident occurred on Broadway, so by the necessities of American high

Jocasta, Catherine de toness de Brinvilliers are familiar examples in point. And in this country, out of seventy-two cases of poisoning, of which count has been kept during the last nineteen years, fifty-eight have been attempted by women. To such an extent has poisoning by To such an extent has poisoning by women been carried that in a case of so-called mysterious poisoning the de-tectives turn to look for a female, and om turn in vain.

"As murderers, women have in the nineteenth century been making a bloody record. Account for it as philosophers or moralists may, the facts seem to show that since woman has asserted her rights to struggle for herself with the world on the same terms as man she has likewise struggled violently, and often murderously, with men and women. The number of murderesses in the nineteenth century has "As murderers, women have in the deresses in the nineteenth century has been as great as the number of heros. Nor have the murderesses been fined to the under class, outside, as it were, of the restraints of civiliza-tion. On the contrary, there have been more murders or killings committed by women in large cities, or civilized communities, than on the frontiers or border lands. Women know very well that in America, at least, there is a sentimental prejudice against hanging one of their sex, and, with their characteristic cunning, they are taking advantage of this fact."

It is easy enough to learn what the

scientific position by a certain scholar and thinker who had a book knowledge of the different theories advocated by the representatives of science, and decided that Agassiz must be ranked in the second or third class. He burst into a roar of laughter.

"Why, just think of it," he said, "he undertakes to fix my place among zoologists, and he is not a zoologist himself. Why, he has never even

been an observer!" It often happens that the men who really know a subject from beginning to end, so far as a human being may, are those who have least time to talk about it. So there are long silences to be filled by the people who are conteint with seeming to know, and few of them have the self-control to resist

A Tariff Effect.

· The young woman's father was one of those men who talk tariff so much that in time they learn to disregard the comfort of their families and talk in the home circle. Thus it was that the girl knew as much about the tariff as she did about housekeeping. Yet she found time in the midst of her political economy to have a couple of real sweethearts, not to speak of a host of fellows who wanted to be. ter she in time chose as the one, and when her father heard of it he called her before him.

her before him.

"So," he said, "you have thrown over this excellent young farmer and chosen a city dude?"

"Yes, papa," she smiled.

"Well, I don't like it, and I want to know your reasons for doing it."

"They are plain enough," she responded promptly, "I have heard you talk tariff until I am thoroughly confined that the only kind of protecvinced that the only kind of protec-tion I need in my home industries excludes the raw material and admits the finished product."

A Curiosity of the Law

Additions to rented premises, when made by the tenant, should never be castened with nails, but with screws, says a St. Louis lawyer. The reason for this lies in the fact that should he wish to move away and take with him the boards and other lumber composing the improvements he has made he can simply draw out the screws and take the planks. If he fastens them with nails, however, he can remove nothing, and the improvements of the Derby this year.

Before his departure for Europe, I cecame quite well acquainted win William Philadelphia, and found him a cheery, light-hearted little man, as a cheery, figure-hearted fittle man, is unpretentious as possible, and yet able to explain the mysteries of his art more clearly than any trainer I have met. And, indeed, he ought to nave some special knowledge of tigers and lions, for he was born thirty-nine years ago in a small menagerie owned by his father, and has been training wild beasts all his life. Not only was both his grandmothers were sho women, the one making much mor women, the one making much money by exhibiting through Europe a black man brought from Africa, and the other doing equally well with a train-

He met with his first serious accident in Odessa at the age of twenty, when a Russian bear bit him twice on the left leg, the first time gouging out a big piece from the fleshy part of the thigh, and the sec ond nearly biting away his knee. The cords and muscles were so injured as to cause a permanent stiffness in the joint and recurring twinges of pain tain changes in the weather. The Thirteen Superstition. The inevitable thirteen superstition came up in a company of which I was one the other day. In my own experience that foolish superstition has been knocked out so often that I rather enjoy sitting down to dinner with thirteen. Once I sat at table with Sir Arthur Sullivan, the composer, as host. There were thirteen overs, it was the 13th of May and the occasion was the thirteenth per-formance of Sullivan and Gilbert's "Iolanthe." Of course nothing came of it. Another time I dined with the Thursday Club, of Philadelphia, at a coadside inn on the Wissahickon. It was discovered that there were thirteen at table, and, one of the party being superstitious, the landlord was asked to come in and make the four-teenth. He did so, and the result was he and not one of the thirteen lied before the year was out. This is the nearest I ever came to having a verification of the superstition within my observation.-Major Handy in

THOSE WHO GO INSANE.

Remarkable Statistics Gathered by the New York Lunacy Commission.
The fourth annual report of the New York State Commission in Lunacy makes an interesting showing of the occupations of insane patients confined in all the State hospitals. In the table showing the occupations of those admitted since October 1, 1888, house-keepers lead, the number of patients having been thus occupied being 2,901 out of a total of 9,503, or a trifle over 30 per cent. Next on the list come

30 per cent. Next on the list come laborers, excluding farm laborers, 1,334 of whom, or 14 per cent., were admitted during that period. Farmers and tarm laborers are put at 1,062, or nearly 11.2 per cent. of those admitted.

Among the principal of the remainder of the occupations represented are the

Agents, 34 patients; commercial travellers 17, clerks 176, salesmen and saleswomen 32, 6 actors, 34 barbers, 18 barkeepers and bartenders, 59 black-smiths, 60 bookkeepers, 40 butchers, only one Christian worker, 42 cigaronly one Christian Worker, 42 cigar-makers, 12 civil engineers, 19 clergy-men, 24 coachmen, 24 cooks, 338 do-mestics, 6 editors, 24 engineers, 96 factory operatives, 35 firemen, 24 gar-deners, 17 hotel keepers, 10 "journal-ists," 21 laundresses, 12 laundrymen, 45 lawyers, 94 leather workers, 61 machinists, 52 masons, 11 mechanics machinists, 52 masons, 11 mechanics, 174 merchants, 15 millers, 16 milliners, 41 molders, 22 musicians, 15 nurses, 95 painters and varnishers, 46 peddlers, 87 physicians, 12 plumbers, 42 printers, 10 railroad conductors, 52 other railroad employees, 35 sailors, 20 saloon-

dents, 73 tailors and tailoresses, 120 teachers, 14 telegraph operators, 14 tinsmiths, 19 waiters and waitresses, 63 workers in metal, 41 workers in stone, 232 workers in wood, 24 bakers. Seven hundred and seventy-three are put down as having no occupation and 132 whose occupation is unascertained. Among the same patients the principal assigned causes of insanity are recorded as follows:

keepers, 25 seamen and boatmen, 63 seamstresses, 12 stenographers, 55 stu-

Imbecility 26, bodily injury 40, cerebral disease 21, cerebral hemorrhage 43, climacteric 167, confinement in prison 36, congenital defect 29, disease of skull and brain 13, epilepsy 408, excessive smoking 14, excessive study 12, typhoid fever 33, general ill-health 596, hereditary predisposition 425, illhealth following over-work 449, intemperance in drink, 911, intemperance in drink and narcotics 117, la grippe 96, moral causes, such as domestic trouble, loss of friends, business anxieties, tright, disappointment, etc., 1,341, old age 307, opium habit 47, consumption 15, physical disease 211, privation and over-work 36, puerperal 134, excesses 16, sunstroke 133, traumatic 156, victous habits and indulgences 49, unascertained 2,819.

It will be seen that among professional men lawyers suffer most, the number of patients of this profession being 45. Physicians rank next at 37, clergymen at 19, artists at 9 and authors at 2. There are 6 each of editors and actors, a rather remarkable thowing for the latter, considering the popular belief regarding the prevalence of insanity among the members of this profession. This may be accounted for in a measure by the knowledge that many a so-called actor keeps to the stage after he becomes crazy, but harmless, as a long-suffering public will attest. It is safer to be a plain sditor than a "journalist," by just 862-3 per cent.

A further examination of the causes of the mental diseases of these patients show that 911, or nearly 10 per cent., were made insane by intemperance in drink, while the reason of 164 more was dethroned by intemperance in narcotics and the opium habit. To over-work and privation are also ac-tredited many of the cases. The moral causes enumerated, resulting in a great degree from weak or overtaxed neryous systems, are responsible also for

a very large proportion of the cases.

Almost exactly two-thirds of the cases to which atter ion has been directed, or 6,225, are of native-born persons. Of the remainder 1,250 were born in Ireland, 729 in Germany, 260 in England and 208 in Canada. remainder are mainly natives of Saxony, Poland, France, Italy, Sweden, Switzerland and Wales.—Troy Press.

Frauds in Dresden and Sevres 'As to porcelain, it is probable that more than half of the "old" Dresden china now exposed for sale is counterfeit. Most frequently the originals have been copied, mark and all, but in some cases really old Dresden china that was originally white has been painted by an ambitious forger. With Sevres china, the more common ware has sometimes had the whole of the original pattern and glaze removed

and received a new ground of turquois or some of the royal colors, to which painting or medallions in the old style have been added. In 1816 a depeuner service, with portraits of Louis XIV. and the principal ladies of his court, was offered to Louis XVIII. as having belonged to his grandfather, Louis XV., but on examination it was found that the principal plateau was of a design not introduced at Sevres until fifteen years after the death of the reputed owner of the service. Instead of adorning the table of the King, the service was relegated to the Museum at Sevres as an interesting forgery. Spurious Palis-sy ware is almost a drug in the market, and nearly every porcelain manu-factory is now represented by pieces either wholly reproductions of its genume products or having their marks and character in some way modified. There is no one who should more diligently apply to himself the motto, "Caveat emptor!" than the collector of pottery and porcelains. — Longman's Magazine.

A Practical Hint to Inventors. It is somewhat amusing to see how often an inventor will pursue a sub-ject that has been exhausted. one of the shrewdest of his class very cautiously told a friend while string in the lobby of one of the leading hotels uptown that he had struck something and, in fact, it was a device really needed in our civilization. The friend smiled and said: "My boy, I supposedly invented the same identical thing fifteen years ago. Before I took out a patent I had the patent office searched, and the reply came back: 'Your device is old; was invented ton years ago."

The patent office ought always to be searched before big fees are rolled up.—Hardware.

QUAY MAY OPPOSE DON CAMERON.

Intimation That the Latter's Political Career Will Soon End.

New York, Sept. 9.—A special to the

Sun from Philadelphia says the recent Sun from Philadelphia says the recent victory of Senator Quay is likely to result in the defeat of the Hon. James Donald Cameron for another term as Senator. It now seems absolutely certain that Senator Quay will oppose the re-election of Cameron to the Senate.

At no time during the hand-to-hand contest just ended did Cameron indicate in any manner to any person in Pennsylvania his desire to see Senator Quay succeed. On the contrary, Cameron was not only indifferent, but he ran away from the fight, not caring whether Quay came out on top or was overborne and came out on top or was overborne and mashed by the Magee and Martin com-

This is not the first time that Cameron has run away from a contest in which Quay staked everything. During the year 1885, Matthew Stanley Quay determined to run for State Treasurer, as a step toward his election to the United States Senate. He consulted Senator Cameron freely in regard to the plan; Cameron strongly advised against it, even going so far as to tell Quay that he would surely be defeated if he went before the people.

Senator Cameron's advice was disregarded. Quay made a most spirited canvass and won on pretty much the same ine as two weeks ago. Throughout the hampaign for the nomination, Cameron doubted the ability of Quay to succeed at the general election; it would be a great mistake to nominate him, as he expressed it.

Senator Quay will not go to Los Angeles or Bar Harbor during the next Senator all campaign in Pennsylvania, but he may be fishing for tarpon among the everglades of Florida just about the time the next Senator is voted for by the Pennsylvania Legislature.

Again I have spent several hours with Senator Quay since his last triumph, and here was force and significance in his irrse remark: "If Cameron is returned to the Senate it will be as the candidate of the combine which tried so hard to be feat me for State Chairman. He is heir candidate and has been throughout the contest, and they will re-elect aim if they can."

is, and to give it a trial. Gets scalded with hot soups, etc., and burned from handling hot dishes.

GOLDSBORO, N. C., Feb. 6, 1895.

Lyon Manufacturing Co., Brooklyn, N. Y. Gentlemen:—I am a waiter in Hotel Kennon, Goldsboro, and sometimes re-scalded with hot soup or coffee, and burned from handling hot dishes and such things. I always use Mexican Mustang Liniment for the burns or scalds and it is only a day or two before they are all healed up. I have, also, great fat . in it for such things as cuts and strains. I thought this might do some one a little good, and I wish to let all my friends know what a good remedy this liniment is. The waiters in this hotel know all about Mustang Liniment for I always recommend it to them, but I want the waiters all over the country to see this and give this liniment a trial if they ever have a burn or scald, or any little thing that is apt to happen to them around the kitchen.
